

C questions: (discussed in class)

Q1: Which is best Compiler or Interpreter?

Q2: History of C.

- timeline

- how language evolved

- ANSI C

Q3: About libraries and difference bw stdio.h vs stdlib.h vs conio.h

Q4: Quotes or angular brackets while using header file in C program.

Q: History of C as state of art.

Q: Why do we need to develop C.

Q: What is C?

Q: What are programming languages used for AI?

Q: Why was virus easy to made in C than in Java?

Q: How does C reaches to file executable?

Q: What file can be considered as a virus?

Q: Advantage of C?

Q: Steps to learn Natural language vs steps to learn C language

Q: What is software?

Q: What are different types of constants in C?

Q: Can we run a C program without a main() function?

Q: Hierarchy of a program?

Q: what are different methods to declare an Array in C.

Q: sorting and searching algorithm

Q: Why loops are so important in programming language? (15 marks)

Q: Why we have to define even a small thing, is it better or overhead for program?

Q: what is string. How it can be implemented using for loop.

Q: write down atleast 7 important functions of string.

Q: How can we calculate two strings & count the frequency

Q: error while using gets(), puts()

Q: what is cosole?

Q: difference between scans(), scanf(), gets()

Q: Similarities & differences between structure and union (15 marks)
(Include definition, synatx, similarities, differences)

Q: Why pointers is a so strong tool?

Q: why C was made?

Q: why pointers are used? (5 marks)

Q: short question on putc, putw.

Q: how many attributes of file (mcq)

Q: call by value, call by reference in swapping algo / program.
