

Final deadline for assignment submission :
28 feb 2023

Classroom link: <https://classroom.google.com/u/4/c/NTk0MDgxNjcxNjk0>

Assignment 1:
Deadline: 26 Dec 2022

Program 1: Implement regula falsi

Assignment 2:
Deadline: 30 Dec 2022

Program 2: Implement Newton Raphson method

Assignment 3 & 4:
Deadline: 10 Jan 2022

Assignment 3 - Implement Gauss Elimination, Gauss Jordan and Gauss Seidel methods

Assignment 4 - Implement Gauss Jordan for inverting a matrix

Implement in Python for solving system of linear equations

Assignment 5:
Q- Implement Lagrange interpolation method using python.

Assignment 6: (given on 15/02/23)
Q- Implement Newton's forward difference interpolation, backward difference interpolation, divided difference interpolation. (You can make all these in single program or different programs)

Q- Implement Numerical differentiation using Newton's forward difference, Newton's backward difference.

Q- Implement Trapezium rule & Simpson's 1/3rd rule for numerical integration.

Assignment 7 (given on 22/2/23)
Q- Implement Runge-kutta 4th order method.
